

WU-Minn HCP Q2 Data Release: Reference Manual

Appendix VIII – Missing Ancillary Files for Q1+Q2 Subjects

13 June 2013

Table of Contents

Ancillary Files Missing for Q1+Q2 Subjects	3
Q2 Missing Physiological Data	4
Q2 Missing Recognition Memory Data	7

Ancillary Files Missing for Q1+Q2 Subjects

This document provides a listing of ancillary files that are missing for Q1 and Q2 subjects released in Q2. We know of missing data of two types: Some subjects are missing physiological data (*_Physio_log.txt) for collected functional (rfMRI or tfMRI) sessions and some are missing recognition memory (REC_run*_TAB.txt) tab-delimited versions of the E-Prime data files for analysis of the working memory task.

In some of these cases where there is missing data, there was a problem with the data collection that is recoverable (e.g., in the physiological data, a gap in the timing between the trigger pulse and pulse/respiratory signal); in other cases, the data was not collected or is otherwise unrecoverable. We are working to resolve these cases and for those subjects whose data is recoverable, the data will be part of the Q3 release (scheduled for August 2013).

Q2 Missing Physiological Data

Subjects missing files *_Physio_log.txt, e.g. rfMRI_REST1_RL_Physio_log.txt

Subject ID	Files Missing
100307	rfMRI_REST1_RL
105115	rfMRI_REST1_RL
